

New employees in Salsnes Filter!

Dear partners and friends .

It is with joy and excitement I inform you of our latest employment. Salsnes Filter is growing accordingly to our increased activity worldwide, even in these uncertain times.

To meet the growing demand from our customers and partners, we have employed a new National Account Manager.

His name is Jørn Eliassen, and he is a 38 years old process engineer. Jørn comes from the mineral industry (Metso Minerals and MinPro), where he has worked in process engineering worldwide. He started in Salsnes Filter 23.03.2009 and will be a valuable asset to our organization.

The first months Jørn will take part in all aspects of our company's routines and work, to learn and get acquainted with colleagues, friends and partners. In near future Jørn will be connected to more specific markets.

We welcome Jørn and wish him all the best.

Ivar Solvi
CEO
